Mixing Spoons

Here's How It's Done : Directions

Total Recipe Weights:

96 grams Activated Charcoal
224 grams Bentonite Clay Powder
24 drops Vitamin E Oil
32 drops Rosemary Essential Oil
12 grams Vegetable Glycerin

Step 1: In a medium sized bowl, begin by weighing out 96 grams of your activated charcoal using your scale.

Step 2: Next, to the same bowl, add 224 grams of your bentonite clay powder. Fully mix the ingredients making sure everything is evenly dispersed.

Step 3: Now, use a disposable pipette to add 24 drops of vitamin e oil.

Step 4: Then, using another pipette, add 32 drops of rosemary essential oil.

Step 5: Finally, use a spoon or spatula to mix the ingredients together.

Step 6: The powdered portion is now finished. Go ahead and scoop the powder into your two ounce jars. Place a lid on each jar.

Step 7: Next, add 12 grams of vegetable glycerin to each of your eight 1 oz. black bullet bottles. Place a disc top lid on each bottle.

Step 8: To use your activated charcoal facial mask you will need a small mixing bowl. Add one tablespoon of powder, two tablespoons of water, and about 1/2 teaspoon of vegetable glycerin. Mix well. Note: We chose to package the powder and glycerin separately. By creating the mask without the water you will not need to add a preservative. This will allow you to prepare a quick product for your customers. Each two ounce jar will create approximately 4 facial masks.

Step 9: Now, apply a thin layer to your face. Allow the mask to harden. Then, rinse with warm water.
