

Beard Conditioner Recipe

Recipe makes approximately 2- 8 ounce bottles.

Here's What You Need:
Ingredients

[Amber Waters Fragrance Oil](#)
[BTMS 25 Emulsifier](#)
[Jojoba Oil](#)
[Vegetable Glycerin](#)
[Vitamin E Oil](#)
[Optiphen Preservative](#)
[8 oz Boston Round Bottles](#)
[Black Lotion Pump 24/410](#)
[Thermometer](#)

Other Ingredients & Equipment You'll Need:

Mixing Bowls
Mixing Spoons
Stick Blender
Pots (3)
Funnel
Water
Scale

Here's How It's Done : Directions

Total Recipe Weights:

- 425 grams Distilled Water
- 20 grams Jojoba Oil
- 25 grams Vegetable Glycerin
- 25 grams BTMS 25 Emulsifier
- 26 grams Amber Waters Fragrance Oil
- 5 grams Vitamin E Oil
- 5 grams Optiphen Preservative

Clean and sanitize your work area as well as your packaging. We suggest that you wear gloves, protective clothing, and a hair net while preparing this recipe.

Step 1: In one of your pots, heat your water to at least 180F and hold for 20 minutes to destroy any bacteria. Remove from heat and set aside. Keep in mind, you will have some evaporation. So, you will want to heat extra water so that you will have 425 grams when you are finished.

Step 2: Using a double boiler, melt the jojoba oil, vegetable glycerin, and BTMS.

Step 3: When the contents of each pot are around 140F, combine them. Use a stick blender to emulsify them.

Step 4: Once the temperature reaches about 120F, add the Optiphen, Amber Waters Fragrance Oil, and the Vitamin E Oil. Once again, stick blend.

Step 5: Allow the conditioner to cool to room temperature. It will continue to thicken as it cools. Then, using your funnel, add the conditioner to the bottles and place a lotion pump on each one.

Your beard conditioner can be used right away. Enjoy!
