[Macadamia Nut Oil](#)

[Mango Butter](#)

[Shea Butter](#)

[Cranberry Balsam Fragrance Oil](#)

[Cranberry Fruit Powder](#)

[Spirulina Powder](#)

[Tomato Red FUN Soap Colorant](#)

[Black Oxide FUN Soap Colorant](#)

[Kelly Green FUN Soap Colorant](#)

[Titanium Dioxide](#)

[Safety Glasses](#)

[Safety Gloves](#)

[Safety Mask](#)

Other Ingredients & Equipment You'll Need:

Distilled Water

Mixing Bowls

Mixing Spoons

Rubber Spatula

Scale

Stick Blender

Vinegar

3lb Loaf Mold

Wooden Skewer

Hanger Tool

Here's How It's Done : Directions

Total Recipe Weights:

277 grams Distilled Water
101 grams Lye

146 grams Mango Butter
146 grams Shea Butter
110 grams Avocado Oil
183 grams Coconut Oil
76 grams Palm Oil
73 grams Macadamia Nut Oil
54 grams Cranberry Balsam Fragrance Oil

Colorants for Green Soap:

10 drops Black Oxide FUN Soap Colorant
5 grams Kelly Green FUN Soap Colorant
3 grams Spirulina Powder
(mixed with a small amount of oils)

Colorants for Red Soap:

7 grams Tomato Red FUN Soap Colorant
2 grams Cranberry Fruit Powder
(mixed with a small amount of oils)

Colorants for White Soap:

6 grams Titanium Dioxide
(mixed with a small amount of oils)

Clean & Sanitize your work area and all of your packaging materials. It is suggested that you wear gloves, protective clothing, a face mask, and safety glasses.

Step 1: Prepare your lye solution. Allow the lye solution to cool to room temperature.

Step 2: While you are waiting for your lye solution to cool, prepare your soaping oils. Once your oils are melted, allow them cool to room temperature.

Step 3: While you are waiting for your oils and lye solution to cool, prepare the colorants.

Step 4: Prepare the colorants listed above.

Step 5: When both the soaping oils and the lye solution are at room temperature, combine them. Then, stick blend the soap batter to emulsify. Next, add the Cranberry Balsam Fragrance Oil. Once again, stick blend your soap batter to incorporate the scent.

Here's How It's Done : Directions

Step 6: Divide the soap batter into three equal portions. Add one of the colorants to each bowl. Stick blend the contents of each bowl.

Step 7: Place the mold in front of you. When your soap is at a thick trace, pour the green soap batter into the mold. Hold back about 2 ounces for the top of the soap.

Step 8: Next, pour the white soap batter directly on top of the green batter. Once again, hold back about 2 ounces of the soap batter to top the soap.

Step 9: Finally, pour the red soap batter on top of the white batter. Hold back about 2 ounces. Then, use your hanger tool to create swirls between each layer.

Step 10: Place the mold in front of you horizontally. Start with the green soap batter. Place a horizontal line across the loaf that is about 1 inch thick. Then, place a white horizontal line next to the green line. Then, place a red line next to the white. Use a wooden skewer to create swirls on the top of the loaf. Start at the left side of the mold. Place the skewer just on the surface of the soap. Create figure eight patterns across the loaf until you reach the left side of the mold.

Step 11: Allow the soap to set up. After 48 hours, remove the soap from the mold. When ready, cut the soap into slices. Allow the soap to cure before using.
