

Dreama Melt and Pour Soap Recipe

Recipe makes approximately 9 bars of soap.

Here's What You Need:
Ingredients

[Hemp Oil Melt and Pour Soap Base](#)
[Diamond Clear Melt and Pour Soap](#)
[Dreama Fragrance Oil](#)
[Large Square Tray Mold Market Mold](#)
[Embed Mold Daisies](#)
[FUN Soap Colorant Neon Yellow](#)
[FUN Soap Colorant Yellow Oxide](#)
[FUN Soap Colorant Neon Green](#)
[FUN Soap Colorant Kelly Green](#)
[FUN Soap Colorant Lime Green](#)
[Vanilla White Color Stabilizer.](#)
[8 ounce Clear PET Bullet Bottle](#)
[White 24/410 Fine Mist Sprayer](#)
[Disposable Pipettes](#)
[Silicone Mold 4 Loaves Mold](#)

Other Ingredients & Equipment You'll Need:

Cutting Board
Scale
Microwave safe containers
Large Knife
Microwave
Wax Paper
Baking Pan (optional)
Rubbing alcohol (in the bullet bottle)

Here's How It's Done : Directions

Step 1: Prepare the yellow soap: First, we will prepare the yellow soap. The yellow soap will be used to create the center of our daisy embeds. It will also be used to create soap confetti. So, weigh out and melt 95 grams of the hemp melt and pour soap. Once melted, add 4 grams of the Dreama Fragrance Oil and 4 grams of the Vanilla White Color Stabilizer. In addition, add 15 drops of Neon Yellow FUN Soap Colorant and 3 drops of Yellow Oxide FUN Soap Colorant. Mix to fully incorporate the ingredients.

Step 2: Next, we will pour the yellow soap. So, use a disposable pipette to fill only the center of each daisy in the daisy embed mold. Then, the remaining yellow soap will be used as soap confetti. You can pour it onto wax paper which will give you a smaller confetti. However, I poured mine into one cavity of the 4 loaf silicone mold. This allowed me to cut thicker chunks of confetti. Allow the yellow soap to setup and cut the soap confetti portion into small squares.

Step 3: Now, we will prepare the soap that will be used for the green soap confetti. So, melt 75 grams of the hemp melt and pour soap. Once melted add 3 grams of Dreama Fragrance Oil, 3 grams of Vanilla White, 7 drops of the Neon Green FUN Soap Colorant and 2 drops of the Kelly Green FUN Soap Colorant. Then, mix everything together. Pour the melted soap either on wax paper or into your silicone mold. Once it has setup, cut it into small squares.

Step 4: Finally, we will prepare the soap that will be used for the lime green soap confetti. So, melt 75 grams of the hemp melt and pour soap. Once melted, add 3 grams of Dreama Fragrance Oil, 3 grams of Vanilla White, 10 drops of the Lime Green FUN Soap Colorant. Then, stir to blend your ingredients together. Again, pour the melted soap either on a pan lined with wax paper or into your silicone mold. Once it has setup, cut it into small squares.

Step 5: Once you have cut all of your confetti, place all three colors in a bowl and mix them together. If they are mixed ahead of time it will make it easier to add them to the soap later.

Step 6: Now, back to daisy embeds. At this time, we need to prepare the white portion of the flower. So, melt 65 grams of the hemp mp soap base. Then, add 3 grams of the Dreama Fragrance Oil and 3 grams of Vanilla White Color Stabilizer. Then, mix to incorporate all of the ingredients together. Spray the yellow soap that is already in the mold with rubbing alcohol before pouring the white soap on top. Fill each cavity of the mold and allow these to setup before removing them from the molds.

Step 7: Prepare your square tray mold. Add one daisy embed to each square in this mold. You want to make sure that the daisy embeds are completely centered in the soap mold.

Step 8: Prepare the first clear layer. Weigh out and melt 420 grams of the Diamond Clear Melt and Pour Soap. Then, add 21 grams of the Dreama Fragrance Oil and 21 grams of the Vanilla White Color Stabilizer. Stir to blend the ingredients. Spray the daisies in the mold with rubbing alcohol. Pour the clear soap slowly into the mold. Allow this layer to setup completely before moving on.

Here's How It's Done : Directions

Step 9: Prepare the second clear layer. Melt 420 grams of the clear mp soap base. Then, add 21 grams of the Dreama Fragrance Oil and 21 grams of the Vanilla White Color Stabilizer. Stir to incorporate the scent.

Step 10: Now, spray your previous clear layer with rubbing alcohol. Then, add the soap confetti to the mold. Spread it evenly throughout the mold. Finally, pour the clear soap into the mold. Allow the soap to setup completely.

Step 11: Once your soap has hardened, remove it from the mold. Cut the soap along the lines that were created by the soap mold.

Your Dreama Melt and Pour Soap is now ready to use! Enjoy!
