

Dual Quench Lipstick

Recipe makes approximately 25 dual lipsticks.

Here's What You Need:
Ingredients

[BEESWAX White Pastilles](#)
[All Natural Lip Balm Base- 1 pound](#)
[VITAMIN E OIL \(Tocopherol T-50\) Natural](#)
[Titanium Dioxide Oil Dispersible](#)
[*QUICK ORDER Lip Tints- 1/2 oz- Diva Red](#)
[Disposable Pipettes](#)
[White Lip Balm Tubes and Caps](#)

Other Ingredients & Equipment You'll Need:

Scale
13 Straws
2 pots (for double boiler)
2 mixing bowls
1 microwaveable bowl
Spatula
Mixing Spoon
Sharp Knife

Here's How It's Done : Directions

Total Recipe Amounts:

- 8 grams of white beeswax
- 106 grams of Natures Garden Lip Balm Base
- 2 grams of Vitamin E Oil
- 2 grams of Titanium Dioxide
- 8 grams of Diva Red Lip Tint Colorant

Step 1: Using the double boiler method, weigh out and melt the beeswax.

Step 2: Cut 13 straws in half and set all of your lip balm tubes erect.

Step 3: Weigh out 78 grams of lip balm base and melt it in the microwave. Once it is in a liquid state, take a pipette and place a few drops of the melted lip balm into the bottom of each tube.

Step 4: Now, place one straw in the center of each lip balm tube opening. Push down gently to ensure the straw is secure in the lip balm.

Step 5: Next, using your pipette again; carefully fill the lip balm tubes with the melted lip balm. Keep your pipette along the side of tube. Do not fill the straw yet.

Step 6: While the lip balm is setting up, place 28 grams of lip balm base into your pot with the melted beeswax.

Step 7: In a separate bowl, weigh out the titanium dioxide and lip tint. Mix this well, making sure that there are no clumps.

Step 8: Next, carefully in a rolling motion, remove the straws from the lip tubes. Do this slowly.

Step 9: Now, once the beeswax and lip balm is in a liquid state, remove it from the heat. Add the Vitamin e oil. Stir well.

Step 10: Add the blended colorant to the mixture. Stir well. Using a pipette, now fill the open portion that has been left behind by the straw.

Step 11: Let the tubes completely set up. Optional: Using a knife, clean up the tops.

We hope that you enjoy your new dual quench lipstick!
