

Fire and Ice Candle Recipe

Recipe makes 2 candles.

Here's What You Need:
Ingredients

[Pillar of Bliss Wax](#)
[NG Volcano Type Fragrance Oil](#)
[Red Nature Friendly Liquid Candle Dye](#)
[Orange Nature Friendly Liquid Candle Dye](#)
[Zinc Core Candle Wicks](#)
[POURING POT](#)
[THERMOMETER](#)
[Round Pillar Candle Mold](#)

Other Ingredients & Equipment You'll Need:
Ice
Scale
Mixing Spoons
Knife
Hot Glue Gun and Stick
Pot (For Double Boiler)
9 x 13" pan (lined with wax paper)

Here's How It's Done : Directions

Step 1: Weigh out 500 grams of the Pillar of Bliss. Using a double boiler, melt the wax. In addition, add 20 drops of the black Nature Friendly Liquid Candle Dye.

Step 2: Once melted, add 50 grams of the NG Volcano Type Fragrance Oil. Stir.

Step 3: Next, prepare your pillar molds. You will need one 3 x 4.5 inch Round mold and one 3 x 6.5 inch round mold. Place a wick in each mold and seal the holes.

Step 4: While keeping the wick centered, fill the molds with ice. We recommend placing the molds in the pan to protect your surface.

Step 5: Pour the candle wax into each mold. Allow the candles to fully set up.

Step 6: Gently remove the candles from the molds. Since the ice will have melted, you will want to do this over a sink.

Step 7: Once you have removed them, allow them to dry out overnight.

Step 8: When your candles are completely dry, you are ready to add the red and orange wax.

Step 9: You will need 75 grams of the Pillar of Bliss. Once melted add 5 drops of the red Nature Friendly Liquid Dye. Add 7 grams of the NG Volcano Type Fragrance Oil. Stir.

Step 10: Line a pan with wax paper and set your candles in the pan. Pour the wax over the top of the candle into the holes created by the ice cubes. Allow the wax to fully set up.

Step 11: Repeat steps 9 and 10 creating orange wax. We colored the orange with 5 drops of the orange colorant.

Once cured, your fire and ice candles are ready to use!
