Step 1: Prepare your lye solution. Allow the lye solution to cool to room temperature.

Step 2: While you are waiting for your lye solution to cool, prepare your soaping oils. Once your oils are melted, allow them cool to room temperature.

Step 3: While you are waiting for your oils and lye solution to cool, prepare the colorants.

Step 4: You will need 1 bowl for your purple soap. Add the 5 drops of colorant to save time. Set bowl aside.

Step 5: When both the soaping oils and the lye solution are at room temperature, combine them. Then, stick blend the soap batter to emulsify. Next, add the Lavender Essential Oil. Once again, stick blend your soap batter to incorporate the scent.

Here's How It's Done : Directions

Step 6: Now, separate your soap batter. At this time, you will need your bowl with the Ultramarine Violet drops in it. Pour about half the soap batter into this bowl.

Step 7: To the leftover soap batter, add the titanium dioxide mixture. Stick blend to mix it all thoroughly. Set aside your white batter. Next, stick blend your purple soap batter until colorant is evenly dispersed.

Step 8: Next, grab your loaf mold. You will begin by pouring some of the purple soap batter into the loaf mold, fill the soap mold about $\frac{1}{3}$ of the way. Next, add a layer of poppy seeds.

Step 9: Pour about $\frac{1}{3}$ of the white soap batter for the second layer. Add another layer of poppy seeds.

Step 10: Pour the rest of the purple soap batter for the last layer. Once the remaining white soap batter is at a thick whipped consistency, add it to the top creating peaks. Then, sprinkle whole lavender on top. We used about 2 grams.

Step 11: After 48 hours, remove the soap from the mold. When ready, cut the soap into slices. Allow them to cure before using.

We hope that you enjoy this Lavender CP Soap Recipe!
