

# Lip Balm Recipe without Beeswax

*Recipe makes approximately 22 tubes of lip balm.*

Here's What You Need:  
Ingredients

[Rice Bran Wax](#)  
[COCONUT Oil-76](#)  
[CASTOR Oil](#)  
[COCOA BUTTER Golden Natural](#)  
[VITAMIN E OIL \(Tocopherol T-50\) Natural](#)  
[Flavoring-Horchatta](#)  
[Powdered Stevia Sweetener](#)  
[White Lip Balm Tubes](#)  
[Disposable Pipettes](#)

Other Ingredients & Equipment You'll Need:  
Scale  
Mixing Bowl  
Mixing Spoon  
Pots (for double boiler)

## Here's How It's Done : Directions

### **Total Recipe Weights:**

21 grams Rice Bran Wax  
37 grams Coconut Oil 76  
35 grams Castor Oil  
17 grams Cocoa Butter Golden Natural  
1 gram Vitamin E Oil  
20 drops of Horchatta Flavoring Oil (optional)  
Stevia Sweetener (optional)

**Step 1:** Clean & Sanitize your work area. Then, prepare all of your packaging materials. It is recommended that you wear gloves, an apron, and a hair net while preparing this vegan lip balm recipe.

**Step 2:** Weigh out 21 grams of Rice Bran Wax and 17 grams of Cocoa Butter Golden Natural.

**Step 3:** Add and melt your Rice Bran Wax and Golden Natural Cocoa Butter to a double boiler. These two ingredients are melted first since they will take longer to melt than the other oils in this recipe.

**Step 4:** Weigh out 37 grams of coconut oil 76, 35 grams castor oil, and 1 gram of vitamin E.

**Step 5:** When your rice bran wax/cocoa butter mixture is in a liquid state, add the remaining oils. Allow the remaining oils to melt thoroughly. Be careful not to get your butters and oils too hot. Remove from heat.

**Step 6:** Add flavoring and stevia to your mixture, if you choose. These are all optional. Hint: Crush stevia into a fine powder, and sprinkle a tiny portion of it into the melted lip balm and mix well. The stevia will not dissolve, it will simply suspend itself in the lip balm.

**Step 7:** Transfer your melted mixture into lip balm tubes using the disposable pipettes. Plastic pipettes work better compared glass pipettes because they do not cool down your base as quickly as glass transfer pipettes do.

**Step 8:** Allow to cool at room temperature. Once cooled, place caps on the lip balm tubes.
