[Cocoa Butter Melt and Pour Soap](#)

[Titanium Dioxide](#)

[Safety Mask](#)

[Safety Glasses](#)

[Safety GLOVES](#)

[THERMOMETER](#)

[Silicone Rose Soap Mold](#)

Other Ingredients & Equipment You'll Need:

Scale

Distilled Water

Mixing Bowls

Spatula

Stick Blender

Here's How It's Done : Directions

Total Recipe Weights for CP Soap:

288 grams Distilled Water
106 grams Lye
16 grams Sodium Lactate
(added to cooled lye solution)

52 grams Apricot Kernel Oil
28 grams Castor Oil
226 grams Coconut Oil 76
106 grams Mango Butter
114 grams Palm Oil
98 grams Shea Butter
126 grams Sunflower Oil
58 grams Ode de Rose Fragrance Oil
2 drops of FUN Soap Colorant Neon Pink
2 tsp Titanium Dioxide (mixed with a small amount of your soaping oils)

Total Recipe Weights for Light Pink Rose Embeds:

57 grams Cocoa Butter Melt and Pour Soap
2 grams Ode de Rose Fragrance Oil
2 drops Neon Pink FUN Soap Colorant
1 drop Tomato Red FUN Soap Colorant

Total Recipe Weights for Dark Pink Rose Embeds:

57 grams Cocoa Butter Melt and Pour Soap
2 grams Ode de Rose Fragrance Oil
1 drop Neon Pink FUN Soap Colorant
2 drops Tomato Red FUN Soap Colorant

Clean & Sanitize your work area and all of your packaging materials. It is suggested that you wear gloves, protective clothing, a face mask, safety glasses, and a hair net while preparing this recipe.

Step 1: Prepare your lye solution. Allow the temperature to drop to room temperature.

Step 2: Prepare your soaping oils. Once you have weighed them out and melted them, allow the temperature of your oils to drop to room temperature.

Step 3: Prepare your light pink rose embeds. Weigh out and melt 57 grams of the Cocoa Butter Melt and Pour Soap. Once melted, add 2 drops of the neon pink FUN Soap Colorant, 1 drop of the tomato red FUN Soap Colorant, and 2 grams of the Ode de Rose Fragrance Oil. Stir. Pour the melted soap into 6 cavities of the silicone rose soap mold.

Step 4: Prepare your darker pink rose embeds. Weigh out and melt 57 grams of the Cocoa Butter Melt and Pour Soap. Once melted, add 1 drop of the neon pink FUN Soap Colorant, 2 drops of the tomato red FUN Soap Colorant, and 2 grams of the Ode de Rose Fragrance Oil. Stir. Pour the melted soap into 6 cavities of the silicone rose soap mold.

Here's How It's Done : Directions

Step 5: Once both the lye solution and soaping oils are at room temperature, combine them and stick blend to emulsify. Add the Ode de Rose Fragrance Oil. Once again, stick blend to incorporate the scent.

Step 6: Separate your soap batter. To a small bowl, add 90 grams of the soap batter.

Step 7: Now, color your soap batter. To the larger portion of soap batter, add the titanium dioxide. Stick blend to incorporate your colorant. Then, add the neon pink colorant to the smaller portion. Once again, stick blend to incorporate the colorant.

Step 8: At this time, place the white soap batter in front of you. Then, pour small amounts of soap directly on top of the white soap in various spots of the bowl. Continue placing small amounts of the soap batter throughout your bowl until it is all used. So, once you are finished, the bowl of soap in front of you will look a bit like a color wheel.

Step 9: Once you have all of the soap batter to the bowl, use your spatula to swirl the soap. Then, pour it into the soap mold.

Step 10: Finally, place your embeds on top of the loaf.

Step 11: After 24-48 hours, remove the soap from the mold. Slice the soap and allow it to cure before using.
