Mixed with a small amount of vegetable glycerin

Clean & Sanitize your work area and all of your packaging materials. It is suggested that you wear gloves, protective clothing, a face mask, and safety glasses.

[Click Here For Basic CP Soap Making Class.](#) Also, before attempting to make any cold process soap, please become familiar with [Soap Making Safety Class.](#)

Step 1: Prepare your lye solution. Allow the lye solution to cool to room temperature.

Step 2: While you are waiting for your lye solution to cool, prepare your soaping oils. Once your oils are melted, allow them cool to room temperature.

Step 3: While you are waiting for your oils and lye solution to cool, prepare the colorants.

Step 4: In addition, prepare the pink melt and pour soap embeds. Weight out 32 grams of the yogurt MP soap. Melt it. Once melted, add the fragrance oil and pink and red colorant. Stir. Pour it into the mold and allow them to setup before removing them from the mold.

Step 5: When both the soaping oils and the lye solution are at room temperature, combine them. Then, stick blend the soap batter to emulsify. Next, add the Pink Lilac and Willow Fragrance Oil. Once again, stick blend your soap batter to incorporate the scent.

Here's How It's Done : Directions

Step 6: Now, separate the soap batter. You will need two mixing bowls. To each of the bowls, add about 16 oz of your soap batter. To the larger portion of batter, add the titanium dioxide mixture. Stick blend to incorporate the colorant.

Step 7: Next, add the light pink colorant to one of the two remaining smaller bowls and the dark pink colorant to the second. Stick blend the contents of each bowl.

Step 8: You will need the mixing bowl containing the dark pink colorant. When your soap batter is at a light trace, add small amounts of the light pink batter to the bowl containing the dark pink batter. Then, add small amounts of the white batter in approximately the same spots. Repeat this process until you have used all of the light pink soap batter. The remaining white soap will be used to top the soap. Set the white soap aside, for now.

Step 9: At this time, you will need the mold in front of you. Pour your pink soap batter into the mold. Tap the mold on your countertop to release any air bubbles.

Step 10: Allow the white soap to thicken to a frosting consistency. Then, add it to a decorating bag with a large round tip.

Step 11: Pipe the top of your soap, placing dollops of soap across the entire mold.

Step 12: Add your pink embeds and sprinkles.

Step 13: After 24-48 hours, remove the soap from the mold. When ready, cut the soap into slices. Allow them to cure before using.
