**Step 1:** Start preparing your lye solution. Pour lye into the distilled water and allow to cool to room temperature.

**Step 2:** Add palm oil and coconut oil 76 together and melt in a double boiler. Set aside.

**Step 3:** Prepare the soap frosting to pipe flowers. Once the soaping oils and the lye solution are room temperature, pour the lye solution into the oils. Use a stick blender to emulsify.

**Step 4:** Add tomato red colorant and mix with the stick blender. Then, add Suede and Peony Fragrance and mix with a spatula. Use an stick blender to continue mixing until a thin frosting like consistency is reached.

**Step 5:** Place a coupler in a piping bag and add the frosting. Attach the Russian piping tip. Place a sheet of parchment paper on the counter and pipe the flowers on parchment paper. If the soap is too thin, wait a few minutes and try again. Once all the desired flowers are made, set them aside.

**Step 6:** Allow your flowers to cure before using.

We hope you enjoy decorating your soap with your Suede and Peony Soap Flowers!
