Step 1: Sanitize & Clear your work space and all of your materials. It is suggested that you wear protective clothing, protective gloves, and a hair net while making this recipe. Also, prepare a bottle of rubbing alcohol.

Step 2: You will need four microwave safe bowls. In each bowl, weigh out and melt 219 grams of Diamond Clear Melt and Pour Soap.

Step 3: Once melted, add 10 grams of Salt Water Taffy scent to each bowl & 10 grams of vanilla white. Stir well to fully incorporate the fragrance oil.

Step 4: Now, use the amounts above to add color to each bowl. Mix each color fully before moving on to the next color.

Step 5: Next, pour the soap into the mold. You want each cavity to be one solid color. So, one cavity will be blue soap, one pink, one orange, and one green. Once you have poured your soap, spray them with rubbing alcohol to release any air bubbles. Allow the soap to harden. Note: Each cavity will only be filled about halfway.

Step 6: When it has setup completely, remove the soap bars from the mold and slice each bar into three equal pieces.

Step 7: Finally, wrap your soap. Cut pieces of parchment paper into 6 inch by 7 inch sections. Then, wrap the soap with the paper and use a twist tie to close the sides. You will end up with soap wrapped like a piece of candy.

Your Salt Water Taffy Soap is now ready to use! Enjoy!
