[Cream of Tartar](#)  
[Cornstarch](#)  
[NG Volcano Type Fragrance Oil](#)  
[Castor Oil](#)  
[Polysorbate 80](#)  
[Vegetable Glycerin](#)  
[Activated Charcoal](#)  
[Tomato Red Oxide FUN Soap Colorant](#)  
[Da Bomb Soap Dye Red](#)  
[Da Bomb Soap Dye Yellow](#)  
[Safety Gloves](#)  
[Safety Mask](#)  
[Safety Glasses](#)  
[Natures Garden Apron](#)

### Other Ingredients & Equipment You'll Need:

Mixing Bowls  
Mixing Spoon  
Scale  
Parchment Paper or Wax Paper

## Here's How It's Done : Directions

### **Total Recipe Amounts for Bubble Bars:**

205 grams SLSA- Sodium Lauryl Sulfoacetate  
230 grams Sodium Bicarbonate- Baking Soda  
112 grams Cream of Tartar  
34 grams Cornstarch  
100 grams Vegetable Glycerin  
12 grams Castor Oil  
12 grams Volcano Type Fragrance Oil  
2 tsp Activated Charcoal  
1 tsp Polysorbate 80

### **Total Recipe Amounts for Red Bath Bomb Mixture:**

60 grams Baking Soda  
30 grams Citric Acid  
7 drops Tomato Red FUN Soap Colorant

### **Total Recipe Amounts for Orange Bath Bomb Mixture:**

14 grams Baking Soda  
7 grams Citric Acid  
4 drops Da Bomb Soap Dye Yellow  
3 drops Da Bomb Soap Dye Red

Clean and sanitize your area and all of your utensils. It is suggested that you wear gloves, an apron, a face mask, and a hair net while preparing this recipe.

**Step 1:** First, weigh out the dry ingredients in a deep mixing bowl. This includes the SLSA, baking soda, cream of tartar, activated charcoal, and cornstarch. Mix the ingredients together and break up any clumps that you find in the mixture.

**Step 2:** Next, in a second small bowl, weigh out the wet ingredients. So, in a small bowl, add the vegetable glycerin, Volcano Type Fragrance Oil, and castor oil.

**Step 3:** Now, add your wet ingredients to your dry ingredients. Mix everything together until you have a dough- like consistency. Note: If your bubble bar dough is too crumbly, you can add some more vegetable glycerin. Although, you want to be careful not to add too much. Adding too much will cause your dough to become too wet and may not set up properly.

**Step 4:** At this time, shape your volcanoes. Our recipe created two. However, it will depend on the size of each volcano you create. Create two volcano shapes out of the dough. Then, hollow out your center. Later, we will fill this cavity with a bath bomb mixture. Allow your volcanoes to completely harden. This typically takes 48-72 hours. It will depend on the humidity of your environment.

## Here's How It's Done : Directions

**Step 5:** Once your volcano bubble bars have set up, prepare your red bath bomb mixture. Weigh out the baking soda and citric acid. Mix the ingredients together and break up any clumps in the mixture. Add the red colorant and mix again.

**Step 6:** Prepare the orange bath bomb mixture. Weigh out the baking soda and add the Da Bomb Soap Dyes. Mix the ingredients together and break up any clump you find in the mixture. Add the citric acid and mix again.

**Step 7:** Fill the hollow portion of each volcano. Begin by adding the red mixture. Then, add the orange on top. Fill the cavity completely.

Your volcano bubble bombs are now ready to use! To use your bubble bombs place one under your warm running bath water.
